Dear Mr. whatson,

I am writing to express my interest for the position full stack developer for
xyz company at abc city,state.
  I was pleased finding the vacancy on Angellist under section dronebase/carrers
beacuse I am convinced that my software developing
skills can provide multifaceted technical solution to the software platform
adopted by xyz company.

To shortly introduce myself, my name is Prashant Rai and I have been developing
webistes and applications for around 1 year. Although I am not
actively searching for a positon, I heard form abc sharma about the availability
for the backend engineer at xyz company. i am thrilled about the
prospects of working with the information technology operation listed in the
vacancy because it happens to be exactly the same experince that I seek for
my carrer path.

Dear Mr. Watson,

I am writing to express my interest for the position as full stack software
developer at [Company X]
in [City, Statel. I was pleased finding the vacancy on website.com] under
section [Careers at]
because I am convinced that my software developing skills can provide
multifaceted technical
solutions to the software platforms adopted by [Company X].

To shortly introduce myself, my name is [Name], and I have been developing
websites and
applications for around to years. Although I am not actively searching for a
position, I heard
from [Colleague name] about the availability for a devops position at Company
X]. I am thrilled
about the prospect of working with the information technology operations listed
in the vacancy
because it happens to be exactly the same experience that I seek for my career
path.

During my 5 years' employment at [Company YJ, I was responsible for overseeing
the development
of innovative systems architecture via Django and Express Frameworks, HTML5,
MySQL, CSS3/SASS,
JavaScript/React and Elasticsearch. I was instrumental for modifying software to
fix errors, allow it to
adjust to new hardware, and to improve its performance, which resulted in $700k
savings within a
three-years timespan. For this result, I had to work closely with system
analyses, engineers, business
stakeholders and programmers to design systems and obtain information on project

abilities and
constraints, performance requirements and interfaces.

In the attachment, you can find my references and resume. It would be a pleasure to discuss
[Company XI needs, and contribute to revenue generating web technologies that are compatible
across numerous platforms, devices and browsers. For any questions, you can contact me via
[Phone number] or [E-mail address). Thank you for your time and consideration.

Best Regards
Prashant Rai
